MANUFACTURER

Chongqing Mexin Best Doors Industry Co. Ltd. is one of the leading door manufacturers in China, which established in 2002. Through 15 years of development, Mexin Best has established a complete organizational structure, including technique research, manufacture, marketing and after service departments. Main products covers Fire rated doors, safety security doors, commercial doors, interior MDF doors, solid wooden doors, automatic garage doors and industry doors. Thanks for positive technique research and international market exploration, Mexin Best have successfully entered to over 30 countries, such as US, European countries, Middle east and South Asian countries, and gained good reputation. It helps Mexin Best keeping stable business relationship with customers of these countries and regions. At the same time, Mexin Best is also very popular in domestic market. The unique and personal design attracts more and more users to choose Mexin Best. Complete range of product line can meet different requirements of various kinds of customers.

Mexin Best contributes to public welfare undertaking, advocating a new generation of industrialization through individual design, scale production and international business concepts. Mexin Best invested to public facility and developed tourism industry to improve the work environment. Mexin Best believes simplicity is beauty, with absorbing advanced international administration experience and humanity care. Mexin Best will introduce more beautiful doors to our life.

STEEL FIRE DOOR

MAIN SPECS

Mexin steel fire doors standard features include:

- 16, 18, 20 gauge flush and paneled doors
- Seamless door edge / edge seam optional
- Non-handed
- 3 hour WHIRLUL fire, positive pressure, and smoke label
- Cold rolled or A40 galvanized steel
- Prime painted with baked on water base paint
- 7 gauge hinge reinforcements
- 10 gauge closer reinforcement
- 16 gauge flush sealed top channel / inverted bottom channel
- Closed hinge cavity
- High density full body polystyrene or honeycomb core
- Blank edge door includes rim exit device reinforcements
- Individual protective packaging

Specification in accordance

Mexin FD30/60 Tested door and frame to ASTM E152-81A; UL10C (1998); ASTM E2074(2000); NFPA 252 (2012) by Intertek.

DOOR

Overall 1-3/4" minimum (44mm) with solid core in a high density particle board Door set certified as resistant to fire for 30 minutes (Fd30). Suitable door set for apartments, offices and commercial building Facing in MDF or Veneer Hardboard according with finish Available in lipped specification. FSC® Certification applies to Standard options.

FRAME

Solid wood Jamb(FD60) and Metal Jamb(FD180) available
Adjustable architrave available

IRONMONGERY

Stainless steel UL marked hinges
Standard Latch or Lock
UL certified Panic Bar (Push Bar)
UL certified Door Closer
Digital Lock and S.S. plate available

OPTION

Automatic drop seal and Threshold available
Oversized Door and Frame
Pre-painted color as RAL color chart

FEATURE

Fire resistance is one of the most fundamental performance criteria for doorsets, resulting in a complexity of interrelated regulations, standards and guides.

A fire door is not just a "door leaf"; it is a complete door assembly encompassing ancillary products, such as, intumescent strips, smoke seals and fire-tested ironmongery. A full, certified fire door assembly will ensure that the fire door will react accordingly within a fire situation and delay the spread of fire within a building, ensuring that people have enough time to escape the building and find safety.

Mexin offers an array of Primer-painted MDF, laminated and veneered fire doors in a variety of styles, colors and wood grain finishes. Fire doors are available unfinished or fully-finished in 30-minute and 60-minute options. Our fire rated doors and doorsets are compliant with all relevant North America Standards and have been tested in accordance with UL 10C. Popular fire-rated hardware options are also available

STANDARD DETAILS

TECHNICAL SHEET

Our wooden fire doors in 30- through 60-minute fire ratings.

	30-minute Wood	60-minute Wood
Category	Category A Category B Neutral Pressure	Category A Category B

STRUCTURAL SPECIFICATION

TECHNICAL SPECIFICATIONS

"MEXIN BEST" Doors specializes in the manufacturer of the highest quality steel security entrance doors based on years of product development, knowledge and expertise. A broad range of security Entrance doors are available suiting customer's different needs.

General Description

The door leaf made of two 0.7mm thick cold rolled steel sheets with vertical and horizontal steel reinforcements for optimal security structure.

The door leaf is filled with polyurethane foam with steel mesh

Door leaf thickness:

- ◆ 45mm
- Frame made of 2.0mm thick cold rolled steel sheets

Option:

- ◆ 0.6mm/0.8mm/1.0mm cold rolled steel or galvanized steel for door leaf
- ◆ 1.5mm/1.8mm/2.0mm cold rolled steel or galvanized steel for frame
- ◆ Infilling material can be honeycomb for thermal

DOOR FINISH:

- ◆ PVC film coating
- ◆ Powder coated
- ◆ Heat transferring

MEXIN BEST® Doors specializes in the manufacturer of the highest quality security armored doors based on years of product development, knowledge and expertise. A broad range of security Armored doors are available suiting customer's different needs.

TECHNICAL SPECIFICATIONS

BT1WL5022CF

General Description

The door leaf made of two 1mm thick galvanized steel sheets with vertical and horizontal steel reinforcements for optimal security structure. The door leaf is filled with polystyrene foam or Rockwool and honeycomb for thermal and acoustic insulation. Various designs and finishes.

Locking System

Different multiple point locking point lock. Improved cylinder protector preventing picking and drilling as well as forcing of the lock cylinder.

Frame

Construction frame made of 1.5mm thick galvanized steel. The frame is mounted directly on the wall with expansion screw to the building structure.

DOOR FINISH

Painting.
Powder coating.

DIMENSIONS

Door Width: 600-1100 mm.
Door Max Height: 2400 mm.

FEATURES INSTRUCTION

Mexin flush door offer thousands of design options to suit any requirement. Start by choosing a distinctive design from our portfolio on the following pages, then enhance your selection with a combination of sticking, panel and moulding profiles.

1. Made from a solid piece of double-refined MDF
2. One-piece construction assures superior appearance and stability for years to come.
3. Seamless-no stile & rail joints visible
4. Glass and other insert options available
5. Precision-crafted, mitered panels and crisp lines are the result of a computer-controlled manufacturing and painstaking hand craftsmanship

MDF BOARD

Medium-density fiberboard is a wood product engineered from hard or soft wood fibers combined with water-resistant binding materials, then subjected to extreme temperature and pressure to form durable, solid panels. MDF construction results in a material much stronger and denser than particle board, yet with a smoother, more consistent appearance than traditional wood.

FLUSH DOOR EDGE

Mexin flush door edge adopts a superior edge finish, provides the highest durability and performance in the industry. We use only double refined MDF in our doors and we prime all surfaces and edges to ensure a long-lasting finish. Whatever your needs, requirements and specifications, we have a solution for you to make your next project a resounding success by cost effective solutions.

HONEYCOMB PAPER

Honeycomb paper is made of high strength corrugated paper which processed through glue spreading, stacking, ressing, cutting, then stretchen to regular hexagon. It is a new resources saving material which has following features:

- a. Light specific weight, high compressive strength, toughness and stable mechanical property
- b. Sound & thermal insulation, humidity proof and nontoxicity.
- c. Anti-vibration and excellent buffering.
- d. Flame retardancy and flat & straight appearance
- e. Environmental protection and resources saving
